SCHOOL DATA SQUAD | FOR DISTRICT LEADERSHIP

Accessibility Assurance Statement

TSDS Report Review Hub | Web Content Accessibility Guidelines (WCAG) 2.1, Level AA

STATEMENT OF CONFORMANCE

School Data Squad affirms that the TSDS Report Review Hub, release 1.20, conforms to the Web Content Accessibility Guidelines (WCAG) 2.1 at Level AA. All 50 Level A and Level AA success criteria are either fully supported or not applicable because the system does not contain that type of content. This is the standard named by the U.S. Department of Justice ADA Title II rule (April 2024) for the web content and mobile apps of public school districts, and the standard referenced by Texas accessibility requirements for public institutions.

68	154	4,156	0
screens tested	screen checks across user roles and screen sizes	automated rule checks passed	accessibility issues remaining

What this means for your district

- **Every staff member can take part.** Superintendents, PEIMS coordinators, data stewards and approvers who use screen readers, magnification, voice control or keyboard-only navigation can review TSDS reports, comment, and sign off just like their colleagues.
- **It supports your ADA Title II obligations.** Districts are responsible for the accessibility of the tools they require staff to use. This statement, and the full Conformance Report behind it, document that this tool meets the federal standard.
- **It is ready for procurement and audits.** File this statement with your technology, procurement or 504/ADA records. A detailed criterion-by-criterion Conformance Report is available on request.

How the system was evaluated

- **Every screen, every role.** All 68 screens, from sign-in through compliance sign-off, the Audit Box, Library, Help and User Guide, were tested while signed in as each type of user.
- **Desktop and phone.** Each screen was tested at a desktop width and a 375-pixel phone width to confirm content reflows without sideways scrolling.
- **Industry-standard engine.** Automated testing used axe-core, the accessibility engine relied on by federal agencies and major technology companies, against all WCAG 2.1 A and AA rules.
- **Hands-on review.** Requirements software cannot test, such as keyboard operation, focus order, timeout warnings and error guidance, were checked by hand. Issues were fixed and the full test was rerun from scratch.

Result of the final full retest: zero accessibility issues, zero pages requiring sideways scrolling on a phone, and every page has a descriptive title and declared language.

SCHOOL DATA SQUAD | OUR ASSURANCES TO YOUR DISTRICT

What Your Staff Can Count On

Each assurance below maps to one or more WCAG 2.1 Level AA success criteria

Works without a mouse

Every button, menu, table, form and dialog can be reached and used with the keyboard alone, with a clearly visible focus outline.

WCAG 2.1.1, 2.1.2, 2.4.3, 2.4.7

Reads correctly aloud

Screen readers announce every control, image, table and status by name, including whether menus are open or items are selected.

WCAG 1.1.1, 1.3.1, 4.1.2, 4.1.3

Easy to read

Text meets the 4.5:1 contrast ratio in light mode, dark mode and every district color theme.

WCAG 1.4.3, 1.4.11

Fits any screen or zoom

Pages reflow on phones and at 400% zoom without sideways scrolling or lost content.

WCAG 1.4.4, 1.4.10, 1.4.12

Never color alone

Compliance statuses such as overdue, approved or flagged always include text or an icon, not just color.

WCAG 1.4.1, 1.3.3

Fair warning on timeouts

Staff are warned before an idle session ends and can extend it with one action.

WCAG 2.2.1

Predictable navigation

Menus and page layouts stay consistent, every page has a clear title, and a "Skip to main content" link bypasses repeated menus.

WCAG 2.4.1, 2.4.2, 3.2.3, 3.2.4

Helpful error messages

Form fields are labeled, and errors explain what went wrong and how to fix it before anything is submitted.

WCAG 3.3.1, 3.3.2, 3.3.3, 3.3.4

Our ongoing commitments

- **Tested every release.** The full accessibility test is rerun and this statement reissued with each new release.
- **Barriers fixed promptly.** Reported accessibility barriers are treated as high-priority defects.
- **Documentation on request.** The detailed WCAG 2.1 AA Conformance Report is available to any district.
- **Accessible alternatives.** If a barrier is found, we will provide the information another way while it is fixed.

Scope of this statement

This statement covers the TSDS Report Review Hub software itself. Files that users upload, such as PDFs, scanned documents and help videos, are only as accessible as the originals; districts should provide tagged PDFs and captioned video where possible. The evaluation is a documented self-assessment by the School Data Squad development team using the methods above; an independent third-party review can be arranged on request.

Report an accessibility barrier

Open Help > Support tickets inside the Hub and submit a bug report that mentions accessibility, or contact your School Data Squad representative. Include the page and what you were trying to do so we can reproduce and fix it.
